

Shantha's Pentavalent Pediatric Vaccine launched in India

- Shan5™ is the first vaccine jointly developed by the Indian company and its parent company Sanofi Pasteur

Hyderabad, India, – November 10, 2014 – Sanofi Pasteur, the vaccines division of Sanofi (EURONEXT: SAN and NYSE: SNY), announced today the launch of Shan5™, its pediatric pentavalent vaccine developed and manufactured by its affiliate Shantha in India. The launch of Shan5™ vaccine received prequalification status from the World Health Organization (WHO) in April 2014.

Shan5™'s prequalification gives many more children in India access to the latest high-quality, fully-liquid, 5-in-1 vaccine. Further, the prequalification helps Shan5™ secure the supply of pentavalent combination vaccines in over 50 emerging and low-income countries. It adds to the existing list of four vaccines that Shantha manufactures, including Shanchol – the innovative cholera vaccine.

"A significant number of babies born every year in India do not have access to modern vaccination programs. The launch of Shan5™ in India means that 27 million babies born annually in India will have access to vaccination, to protect them from 5 potentially deadly diseases. By launching Shan5™, Shantha will be contributing to filling this immunization gap for the benefit of babies and their parents", said Dr. Harish Iyer, CEO - Shantha.

As the first doses are being made available, the Company has different plans to respond to different needs: public vaccination programs and vaccination in the private practice.

About Shan5™

Shan5™ is a fully-liquid five-in-one, convenient, safe and high-quality vaccine that provides effective protection for children from 6 weeks of age against five diseases: diphtheria, tetanus, pertussis, Hib and hepatitis B. Shan5™ vaccine has been developed and is produced by Shantha in Hyderabad, India.

About Shantha

Shantha, which was acquired by Sanofi Pasteur Holding in 2009, is a biotechnology pioneer from the emerging countries, founded by Dr. K I Varaprasad Reddy in 1993 in Hyderabad, India. Shantha is a fully integrated biotechnology company involved in R&D, manufacturing and marketing.

Shantha's mission is to develop, produce and market human healthcare products that are affordable and meet the highest International standards. Shantha's products complement Sanofi Pasteur's portfolio. Four of its licensed vaccines are WHO-prequalified: Shan5™ pediatric vaccine, Shanchol™ cholera vaccine, Shanvac-B® hepatitis B vaccine, and ShanTT™ tetanus vaccine. Sanofi Pasteur and Shantha are also developing a new pediatric combination vaccine based on Shan5 that will incorporate Sanofi Pasteur's Inactivated Polio Vaccine (IPV) in order to secure polio eradication.

About Sanofi

Sanofi, an integrated global healthcare leader, discovers, develops and distributes therapeutic solutions focused on patients' needs. Sanofi has core strengths in the field of healthcare with seven growth platforms: diabetes solutions, human vaccines, innovative drugs, consumer healthcare, emerging markets, animal health and the new Genzyme. Sanofi is listed in Paris (EURONEXT: SAN) and in New York (NYSE: SNY).

Sanofi Pasteur, the vaccines division of Sanofi, provides more than 1 billion doses of vaccine each year, making it possible to immunize more than 500 million people across the globe. A world leader in the vaccine industry, Sanofi Pasteur offers a broad range of vaccines protecting against 20 infectious diseases. The company's heritage, to create vaccines that protect life, dates back more than a century. Sanofi Pasteur is the largest company entirely dedicated to vaccines. Every day, the company invests more than EUR 1 million in research and development. For more information, please visit: www.sanofipasteur.com or www.shanthabiotech.com

Forward Looking Statements

This press release contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995, as amended. Forward-looking statements are statements that are not historical facts. These statements include projections and estimates and their underlying assumptions, statements regarding plans, objectives, intentions and expectations with respect to future financial results, events, operations, services, product development and potential, and statements regarding future performance. Forward-looking statements are generally identified by the words "expects", "anticipates", "believes", "intends", "estimates", "plans" and similar expressions. Although Sanofi's management believes that the expectations reflected in such forward-looking statements are reasonable, investors are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of Sanofi, that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include among other things, the uncertainties inherent in research and development, future clinical data and analysis, including post marketing, decisions by regulatory authorities, such as the FDA or the EMA, regarding whether and when to approve any drug, device or biological application that may be filed for any such product candidates as well as their decisions regarding labelling and other matters that could affect the availability or commercial potential of such product candidates, the absence of guarantee that the product candidates if approved will be commercially successful, the future approval and commercial success of therapeutic alternatives, the Group's ability to benefit from external growth opportunities, trends in exchange rates and prevailing interest rates, the impact of cost containment policies and subsequent changes thereto, the average number of shares outstanding as well as those discussed or identified in the public filings with the SEC and the AMF made by Sanofi, including those listed under "Risk Factors" and "Cautionary Statement Regarding Forward-Looking Statements" in Sanofi's annual report on Form 20-F for the year ended December 31, 2013. Other than as required by applicable law, Sanofi does not undertake any obligation to update or revise any forward-looking information or statements.
